

2 Bundle Application

Row 1- Apply 2 pieces just below the Occipital Bone, two fingers width from the hairline on sides and nape. Lift hair up to ensure you cant see the bonds in a ponytail.

Row 2- Apply 3 pieces 1-2 fingers width above Row 1, slightly above the Occipital Bone. Think "brick-lay" pattern from row to row.

Row 3- Apply 4 pieces 1-2 fingers width above Row 2, even with the top of the ear.

Row 4- Apply 5 pieces about 1-1.5" above the top of the ear. The side pieces should sit between the front and back of head division line. Lift hair above ear to ensure you cant see the bonds in a ponytail.

Row 5- Apply 3 pieces just below the low Crown. This row should sit at least an inch from any visible swirls or cowlicks. The placement can be shifted right or left to customize for growth patterns. This row is optional base on density and the needs of front segments. Single-Sided pieces are another alternative for this row.

Front Segment Row 1- Apply 2 pieces on a slight diagonal back below the Parietal Ridge. Front piece utilizes Single-Sided Tape, back piece utilizes two-piece extension. Repeat on opposite side. This row may be placed lower and closer to front hairline if texture and density permits.

Front Segment Row 2- Apply 1 piece at Parietal Ridge, centered between Row 1 pieces. This piece utilizes Single-Sided Tape.
